Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit [hartfordfunds.com](http://hartfordfunds.com).

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in a fund's full prospectus and summary prospectus, which can be obtained by visiting [hartfordfunds.com](http://hartfordfunds.com). Please read it carefully before investing.

<sup>1</sup> Expenses as shown in the Fund's most recent prospectus. Gross expenses do not reflect contractual expense reimbursement arrangements. Net expenses reflect such arrangements in instances when they reduce gross expenses. These arrangements remain in effect until 2/28/25 unless the Fund's Board of Directors approves an earlier termination. Without these arrangements, performance would have been lower.

**Important Risks:** Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Foreign investments, including foreign government debt, may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets. • Fixed income security risks include credit, liquidity, call, duration, inflation, event and interest-rate risk. As interest rates rise, bond prices generally fall. • Investments in high-yield ("junk") bonds involve greater risk of price volatility, illiquidity, and default than higher-rated debt securities. • Derivatives are generally more volatile and sensitive to changes in market or economic conditions than other securities; their risks include currency, leverage, liquidity, index, pricing, regulatory and counterparty risk. • The Fund's investments may fluctuate in value over a short period of time. • Because the Fund is non-diversified, it may invest in a smaller number of issuers, and may be more exposed to risks and volatility than a more broadly diversified fund. • The value of inflation-protected securities (IPS) generally fluctuates with changes in real interest rates, and the market for IPS may be less developed or liquid, and more volatile, than other securities markets. • Restricted securities may be more difficult to sell and price than other securities. • The Fund may have high portfolio turnover, which could increase its transaction costs and an investor's tax liability.

**Effective Duration** measures the sensitivity of an asset or portfolio's price to nominal interest rate movement. **30-Day SEC Yield** reflects the hypothetical net current income earned, after the deduction of a fund's expenses, during a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the period. Actual income distributions will usually differ. **Unsubsidized 30-Day SEC Yield** is the Fund's 30-Day SEC yield without the impact of fee/expense waivers.
