

ROIS

Designed to provide efficient exposure to the developed (ex-US) and emerging small-cap equity market.

Our systematic, rules-based index methodology is designed to simultaneously address risks while seeking exposures to return-enhancing factors:

Set Risk Parameters

Seek to improve diversification versus a cap-weighted benchmark by reducing concentration at the sector, market cap, and individual company levels

Select Securities

Seek companies with a favorable combination of low valuation (50%), high momentum (30%), and high quality (20%) investment factors

Reconstitute and Rebalance

Reapply the investment process twice a year in March and September to ensure the portfolio stays true to the rules-based index methodology

¹Expenses are the total annual fund operating expenses as shown in the most recent prospectus.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in a fund's full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

ETF shares are bought and sold at market price, not net asset value (NAV). Total returns are calculated using the daily 4:00 p.m. Eastern Time NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns an investor would receive if they traded shares at other times. Brokerage commissions apply and will reduce returns.

Fund Objective: The Fund seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks the performance of small capitalization exchange traded equity securities located in both developed and emerging markets.

MSCI ACWI ex USA Small Cap Index is designed to capture small cap securities across developed markets countries (excluding the US) and emerging market countries. Indices are unmanaged and not available for direct investment.

MARCH 31, 2024

Hartford Multifactor International Small Company ETF

Sector Allocation (%)

ROIS diversifies exposure across sectors and explicitly avoids unintended sector concentrations.

	ROIS	MSCI ACWI ex-USA Small Cap Index	Underweight/Overweight
Utilities	6	3	3
Health Care	9	7	2
Consumer Staples	8	6	2
Communication Services	6	4	2
Information Technology	12	12	0
Real Estate	9	9	0
Energy	3	4	-1
Consumer Discretionary	10	12	-2
Financials	9	11	-2
Materials	9	11	-2
Industrials	18	21	-3

Based on Global Industry Classification Standard (GICS), which was developed by and is the exclusive property and a service mark of MSCI Inc. (MSCI) and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P).

Excludes cash. May not total to 100% due to rounding and/or pooled vehicle allocations.

Country Allocation (%)

ROIS provides more diversified exposure to countries and reduces concentration in dominant global currencies.

Important Risks: The Fund is new and has a limited operating history. Investing involves risk, including the possible loss of principal. The net asset value (NAV) of the Fund's shares may fluctuate due to changes in the market value of the Fund's holdings. The Fund's share price may fluctuate due to changes in the relative supply of and demand for the shares on an exchange. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • The Fund is not actively managed but rather attempts to track the performance of an index. The Fund's returns may diverge from that of the index. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets. • Investments focused in a country, region, industry or group of industries may increase volatility and risk. • Small-cap securities can have greater risks, including liquidity risk and volatility than large-cap securities.

OPV, or Indicative Optimized Portfolio Value, is a calculation disseminated by the stock exchange that approximates the Fund's NAV every fifteen seconds throughout the trading day. **Price/Earnings** is the ratio of a stock's price to its earnings per share. **Price/Book** is the ratio of a stock's price to its book value per share. **Nominal Countries/Companies** represents the total number of countries/companies included in the portfolio, regardless of allocation. **Effective Countries/Companies** measures portfolio concentration, in which a higher number would indicate a more diversified portfolio. **Debt-to-equity ratio** measures a company's financial leverage calculated by dividing its total liabilities by stockholders' equity. **Return on Equity** is the average amount of net income after taxes that a firm is able to earn as a percent of stockholders equity. **Index Dividend Yield** is the weighted average dividend yield of the securities in the underlying portfolio index (including cash). The number is not intended to demonstrate income earned or distributions made by the Fund and is not necessarily indicative of the dividend yield of the Fund. Fundamental characteristics are based on industry-standard calculation methodologies and determined by Hartford Funds. Holdings may not sum to 100% due to cash allocations. Sources for all data: Bloomberg, MSCI, and Hartford Funds.

ETFs are distributed by ALPS Distributors, Inc. (ALPS). Advisory services may be provided by Hartford Funds Management Company, LLC (HFMC), or its wholly owned subsidiary, Lattice Strategies LLC (Lattice). HFMC and Lattice are SEC registered investment advisers. Hartford Funds refers to Hartford Funds Distributors, LLC, Member FINRA, HFMC, and Lattice, which are not affiliated with ALPS.

The indices, which our multifactor ETFs seek to track, are calculated and distributed by Solactive AG, a firm retained and paid by the Indices' Provider (Lattice Strategies). Lattice Strategies is responsible for the methodology and selection of each index component.
