

High Long-Term Returns Require Patience

Sticking with stocks in turbulent times requires patience—but it has historically paid off.

When investors hear that stocks have averaged an annual return of 10.28% since 1926, they may mistakenly believe that stocks will return 10% most years. In reality, stocks have only returned between 8 and 12% in six calendar years since 1926.

S&P 500 Index Annual Total Returns (1926–2023)

Painful			Challenging			Good			Exceptional		
>-20%	-16 to -20%	-12 to -16%	-8 to -12%	-4 to -8%	0 to -4%	0- to 4%	4 to 8%	8 to 12%	12 to 16%	16 to 20%	>20%
1930 -24.89	2022 -18.11	1973 -14.68	1929 -8.41	1977 -7.15	1934 -1.44	1960 0.46	1947 5.70	1926 11.62	1965 12.45	1944 19.75	1927 37.48
1931 -43.33			1932 -8.19	1981 -4.92	1939 -0.41	1970 3.85	1948 5.50	1959 11.95	1971 14.30	1949 18.79	1928 43.60

			2001 -11.88								1951 24.01

Past performance does not guarantee future results. The performance shown above is index performance. Investors cannot directly invest in an index.

Bottom line: The high returns that stocks have delivered come with significant volatility—but this has been worthwhile for long-term investors.
